Event Overview

The Art Gallery Hopping Team Building Activity is the first of its kind therapeutic corporate social activity package designed specifically for corporate institutions looking to invest in enriching their employees' emotional and physical conditions in a more relaxed, educational, innovative, and artistic way.

As the saying goes; "The wealth of the business depends entirely on the health of the workers."

Great For: Analytical Thinking, Creative Thinking, Teamwork, Communication, Therapy.

Duration: 1h30 – 2hours.

Players: Minimum of five 5 pax; Maximum of twenty (20) per team.

You'll Need: To hop-on art galleries, identify and capture two (2) artworks that reflect the given subject on the day. E.g., Hope, Joy, Love, Peace, Sadness etc.

How to play art analysis: -

To play art analysis, we will divide your players into equal teams using Toura's ice breaking methods and will make sure each team has a smartphone or camera to take pictures on the day of the event.

What you will need:

- Camera / Smartphone.
- Hop-on at least 3 art galleries.

Then we will set a time limit, say, 45 minutes to an hour to hop-on art galleries and 30 - 45 minutes to analyze the chosen or favourite artworks based on the subject. Each team works separately with a limited guidance from an expert to identify the artworks that reflect the given subject. Once the time limit has elapsed, stop, and arrange how you going to present your findings or outcomes based on the subject, each team member should be allocated a point to present, and members will be allowed to add to his/her points while presenting.

The winning team is the one whose artworks seamlessly reflect the subject and have gathered enough points to support their findings or perspectives. If multiple teams have chosen the same artworks, the team presented the much-detailed points wins.

Additional Options: -

- Teams will be given a task to create or paint the artwork that reflect the given subject on the day and will receive expert guidance from the facilitators.
- Note: All materials needed to complete this task will be charged separately.

Product Offering and Pricing
